UNIVERSITY

Center for Advanced Emergency Care

PREHOSPITAL AND DISASTER CARE CERTIFICATE

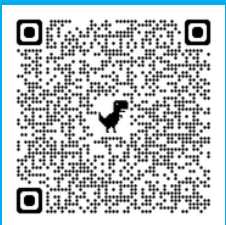

Build the skills to lead in emergencies—anywhere in the world. Emergency medical services (EMS) and disaster care are vital to health system resilience—whether responding to daily emergencies in cities or crises in low-resource settings. In both developed and low- and middle-income countries (LMICs), timely prehospital care and coordinated disaster response save lives and strengthen communities. This certificate program equips participants with the expertise to lead, innovate, and improve systems in any setting.

Prehospital and Disaster Care Certificate Lead

Irfan Husain, MD, MPH, FACEP

PROGRAM HIGHLIGHTS

- Foundational training in EMS operations & disaster response
- Expert-led didactics – in-person, virtual, or hybrid
- Observerships within our EMS agencies & specialty transport teams (e.g. EMS dispatch centers, BLS/ALS/critical care/biosafety transport, mobile integrated health, mobile stroke unit, and more)
- Consultation services - strengthen your local EMS or disaster practices
- Capstone project in research or quality improvement tied to your home EMS system
- CME conference attendance to expand your knowledge and network
- Flexible, 1-year format tailored to your goals and availability

Lead change. Save lives. Strengthen systems.

ABOUT THE CENTER

The Center offers certificate programs in high-yield areas of advanced emergency medicine, tailored for visiting scholars from around the world. These accelerated courses will allow clinical leaders to gain critical knowledge while continuing to serve and lead in their home institutions.
