

Emory SCDP ECHO Program: Ebola Mini Series  
“Ebola in the Age of COVID: Identify, Isolate, Inform” – July 15, 2021  
[Additional Resources](#)

*In case of identifying person under investigation (PUI) for Ebola virus disease (EVD), it is important to inform the appropriate health officials right away. Please first contact your county or state’s public health officials, who will coordinate with the Georgia Department of Public Health, who in turn will coordinate with Emory University as the regional treatment center, as needed.*

**Region IV Ebola Virus Disease Coordination and Transportation Plan**

<https://netec.org/wp-content/uploads/2017/11/Region-IV-EVD-Transportation-and-Coordination-Plan.pdf>

Contains the correct points of contact for each Region IV state and outlines recommended communication channels.

**National Emerging Special Pathogens Training and Education Center:**

<https://netec.org/>

Provides many training materials, webinars, and toolkits for preparation and management of emerging special pathogens, including Ebola.

**NETEC’s Special Pathogen Mystery Drill Toolkit:**

<https://repository.netecweb.org/items/show/176>

Provides guidance and tools for conducting a mystery patient drill, which is a good way to assess your facility’s preparedness and your identify, isolate, inform protocols.
