SECTION 6 - Speech-Language Pathologist

SECTION 6 - Speech-Language Pathologist

Speech-Language Pathologist

They work with patients to find the most appropriate solutions as communication needs change with disease progression. Some examples of Augmentative and Alternative Communication (AAC) may be message/voice banking, communication applications on commercially available technology, speech-generating devices funded through insurance. Speech-Language Pathologists with experience in AAC are recommended to assist with evaluations and the decision-making process.
