

EMORY
UNIVERSITY
SCHOOL OF
MEDICINE

Department of Radiology
and Imaging Sciences

35th Annual Heinz S. Weens Memorial Lecture

ALL OF THE EMORY COMMUNITY IS INVITED!

Donna J. Cox, MFA, PhD

Director, Advanced Visualization Lab (AVL), NCSA
University of Illinois at Urbana-Champaign

“VISUALIZING THE UNIVERSE AND EMPATHY”

The late Roger Ebert said that movies are like a machine that generates empathy about life, gender, race, and other issues. **Donna J. Cox** believes that artistically rendered, scientific visualization movies are not just informative. They can also help tell vital stories, elicit a deeper understanding of the forces of nature, and create empathic awareness for the universe through IMAX movies and other large-screen productions. **Cox's** presentation will provide a visual feast of the art and science behind data visualization and will take the audience on a journey into stars, galaxies, hurricanes, and tornadoes.

Thursday, March 14

5:00 p.m. - Reception | 6:15 p.m. - Presentation

WHSCAB Plaza & Auditorium

Please join us in celebrating the rich history of Emory Radiology

RSVP by March 4, 2019 to
